

Damar ardian alfirisky

Junior Web Developer | IT Support
South Tangerang, Indonesia | damar.rizki212@gmail.com | +6289506637083

Profile

I'm a fresh graduate in Information Systems with a strong focus on DevOps and backend technologies. I have hands-on experience building and managing on-premise Kubernetes clusters from scratch, along with implementing CI/CD pipelines using GitLab CI and ArgoCD.

I am experienced in Infrastructure as Code with Terraform, monitoring using Prometheus and Grafana, and managing Linux-based production servers. I bring strong problem-solving skills, adaptability, and a continuous learning mindset to deliver reliable and scalable systems

Education

Gunadarma University, Depok

Bachelor, Oct 2021 to Aug 2025

Earned a Bachelor's degree in Information Systems from Gunadarma University with a GPA of 3.70. Throughout my studies, I was actively involved as an Information Systems Laboratory Assistant, where I supported academic activities and maintenance device.

Experience

Devops Engineer Intern, PT Wahana Prestasi Logistic, South Tangerang

Dec 2025 to Jun 2026

- Built and managed Kubernetes clusters from scratch on on-premise infrastructure
- Implemented CI/CD pipelines using GitLab CI and ArgoCD
- Developed Infrastructure as Code (IaC) using Terraform for automated provisioning
- Configured monitoring and alerting using Prometheus and Grafana
- Managed containerized applications using Docker
- Maintained and optimized Linux-based servers
- Utilized Headlamp for Kubernetes cluster management and visibility
- Ensured high availability, scalability, and reliability of production systems

IT Support & Data Entry, Gunadarma University, Depok

Oct 2023 to Nov 2025

As an IT Support staff at the Information Systems Laboratory, I ensured the smooth operation of laboratory equipment and supported various academic activities. My responsibilities included maintaining hardware and software, troubleshooting technical issues, and managing large volumes of student data with accuracy and attention to detail.

Key responsibilities:

- Maintaining and configuring laboratory hardware and software.
- Installing required applications for academic use.
- Troubleshooting system and network issues.
- Processing and organizing hundreds of student data entries.
- Assisting lecturers and students during practical sessions.

Digital Forensik, Direktorat Jendral Pajak

Nov 2024 to Jan 2025

During my internship, I gained hands-on experience in understanding how digital forensic techniques are used to support tax investigations and uncover attempts to hide or alter digital evidence.

- Learned how tax investigators detect digital evidence manipulation and uncover concealed information.
- Used **FTK Imager** to acquire and analyze digital evidence.
- Studied and applied **hashing functions** to verify data integrity.
- Analyzed **metadata** to trace digital activity and validate file authenticity.
- Developed a deeper understanding of digital forensic workflows in tax compliance and investigative processes.

Additional Experience

GPdi's WBIS Website, Freelance

Jun 2025 to Jun 2025
